Objective

Certified Cybersecurity Analyst with a foundational background in Full-Stack Development (React, Node, MongoDB) and a deep commitment to security principles. Recently achieved CompTIA Security+ and Google Cybersecurity Certificate. Eager to leverage technical skills and structured learning in SIEM, security frameworks, and network analysis to transition into an entry-level Security Analyst or Associate role. Proficient in English and Korean.

Technical Skills

- **Cybersecurity Tools & Concepts:** SIEM, Wireshark, Nmap, Incident Response, Vulnerability Assessment, IAM
- **Network Fundamentals:** TCP/IP, Firewalls, Network Protocols
- **Operating Systems & Scripting:** Linux (Bash), Windows Server (powerShell), Python, SQL, C, Git, SSH
- **AppSec & Development:** Java, JavaScript, TypeScript, Node, Express, React, Vue, Redux, MongoDB, Tailwind, Three.js, Secure Coding Principles
- **Languages:** English (Professional), Korean (Professional)

Certification

- CompTia Security+
- Google Cybersecurity Certificate

Experience

Web Developer **Conquest Outback Productions** *Alberta, Canada* **02/2025 - Present**

- Developing a website from scratch for diverse clients using wordpress.
- Implementing on-page SEO best practices, including keyword optimization, meta tags, and performance enhancements.
- collaborating directly with clients to define requirements, acting as the primary point of contact for technical specifications and quality assurance.

Freelance Developer **Olive Hair Salon** *Alberta, Canada* **01/2024 - 09/2024**

- Developing a website for Olive Hair Salon using React, and SCSS applying best practices for secure coding.
- Collaborating with another developer to create a beautiful salon website.
- The website has been taken down but can provide source code and how it looks on a local server.

International Admissions Office **Robertson College** *Alberta, Canada* **04/2023 - 07/2023**

- Organized and maintained crucial data systems, ensuring information accuracy and accessibility.
- Provided responsive and effective support to students.
- Verified and managed documents, maintaining compliance with established protocols.

Web Developer Internship **Education Canada Group** *Alberta, Canada* **01/2023 -**

Cyber Security Mount Royal University Alberta, Canada 01/2024 –
02/2025

- Completed coursework covering the 8 domains of security to prepare for advanced certifications (e.g, CISSP)
- Gained foundational knowledge in Risk Management, Security Operations, Network Security, and Identity and Access Management (IAM) principles.

Web Developer	<u>Southern Alberta Institute of Technology</u>	Alberta, Canada	09/2022 - 12/2022
---------------	---	-----------------	-------------------

- Completed a program focused on modern web development (React.js, Vue.js), which provided a baseline understanding of the application development lifecycle

Computer Science **University of Manitoba** *Manitoba, Canada* **03/2020 - 07/2022**

- Coursework included Calculus 1&2, Discrete Math, Linear Algebra, and Statistic, which gave me a strong foundation in problem-solving and logic,
- Gained core expertise in Data Structures & Algorithms and Object-Oriented Programming.
- Studied Fundamental computing principles, including Algorithm Analysis and Intro to Computer Systems.

- **Full-Stack Social Media website.**
 - Fully functioning social media website using React, MongoDB for databases to store users and passwords as well as user images and posts and Express for backend framework
- **Full-Stack Netflix clone**
 - using React as the framework and Firebase, Firestore and google auth used for user authentication
- **Fitness website**
 - Made with React and using ExerciseDB API from rapidAPI
- **Maze Solver & Sudoku Solver**
 - Developed Maze solver and Sudoku solver in Java using the backtracking algorithm.
- **Implementing Firewall on home lab**
 - Using windows 11, kali, and pfSense on virtual box to create a homelab and implementing, configuring firewall.
- **Wireshark packet analysis**
 - Identified the TCP three-way handshake in captured traffic
 - Traced DNS queries and responses
 - Observed how different protocols appear in packet captures
- **Splunk Siem Lab**
 - Ingested Windows, AWS, and web logs into Splunk, built correlation searches for authentication activity, created dynamic dashboards, configured alerts for brute-force and ransomware behavior, and used advanced SPL commands for data analysis.
